Digital Media Checklist

Evaluator Name	Gustavo Santamaria
Date	July11, 2024
Resource	Video Presentation
Validity(Currency,Relevancy, Authority, Accuracy,Purpose)	The video presentation is current and highly relevant to the mini-course on safe flying practices and professional development for recreational drone enthusiasts. It was created by an experienced instructional designer specializing in drone safety education, ensuring its accuracy and pertinence to the course content. The primary purpose of the video is to provide a comprehensive guide on safe drone flying practices, enhancing the learning experience for course participants.
License	The video is licensed under Creative Commons Attribution-NonCommercial-ShareAlike (CC BY-NC-SA).
Accessibility	The video includes closed captions and audio descriptions to ensure accessibility for all learners. The content adheres to WCAG guidelines, including clear audio and high-contrast visuals.
Summary/Contents	The video presentation, created using Zoom and Canva slides, covers essential drone flying safety guidelines, including inspecting the drone, understanding airspace regulations, respecting privacy, checking weather conditions, maintaining visual line of sight, and emergency procedures. It provides a clear, engaging, and informative overview, making it an excellent addition to the mini-course content.
Comments	The video effectively conveys crucial safety guidelines, aligning perfectly with the course objectives. It serves as an invaluable resource for participants, enhancing their understanding and adherence to safe drone flying practices. Adding final publication details, such as the YouTube URL, will ensure the video is accessible to all intended viewers.
